## *19000 Telescoping Cantilever Lift-O-Squeeze™*

The **Telescoping Cantilever Lift-O-Squeeze™** assists in providing load handling for lifting rolls and drums. The **Telescoping Cantilever Lift-O-Squeeze™** mounts to standard LIFT-O-FLEX™ Lifters and is powered by the Electronic Power Pack.

The **Telescoping Cantilever Lift-O-Squeeze™** is easy to configure and adapt to different loads. It is also simple to use and is designed to not damage products. The **Telescoping Cantilever Lift-O-Squeeze™** comes standard with a 12" stroke. An optional 20" stroke is available. The squeeze arms can be mechanically adjusted to fit larger or smaller loads.

Product handling is accomplished with a gentle, controllable force with the **Telescoping Cantilever Lift-O-Squeeze™** arms holding products in place during lifting and transport. Operation of the unit is simple and easy using the controls mounted on the lift mast.

The **Telescoping Cantilever Lift-O-Squeeze™** is equipped to handle loads up to 200-lbs and was designed to pick up a drum from the opposite side of a pallet (made possible by adding counterweights).

Custom designed gripper pads available.

**Squeeze:** Depress the “squeeze” pushbutton control. Squeeze stops movement based on squeeze pressure preset at the factory.

**Release:** Depress the “release” pushbutton and the “inhibit” pushbuttons simultaneously.

**Supported Features:**

- Short front legs
- Fixed front casters
- Extended back legs
- Extended handlebar
- Ease of mobility
